## Brian Martin

**Date of Injury:** May 2001  
**Injury Level:** Paraplegic, T12

### **Cause of Injury:**

Brian was driving home from work on his motorcycle when the back tire hit gravel and threw Brian off his motorcycle.

### **His Outlook on Life After the Accident:**

Disability is a mind set, sure there are things that I struggle at; but so does everyone else.

Brian is involved with Marathons, Skiing, Triathalons, Bobsleigh, and also attends the odd ballet.

Life needs to be lived with good times and bad times, I just place the good higher up.

### **Employment:**

Brian is a Systems Developer for CLINICARE, a medical software company. Brian started his Bachelor of Science degree before his accident, wrote his first term finals in the hospital, and started his second term part time classes before starting therapy sessions. Brian graduated in 2004.

Brian also has his Red Seal Chef papers.

### **Advice to Others with Disabilities:**

"Find an adventure and go for it big or small. You only live once, make every moment count good or bad."

## *MISSION STATEMENT*
